Jaspreet Ahluwalia

San Jose, CA | jaspreetahluwalia007@gmail.com | LinkedIn | github.com/JaspreetSinghA

EDUCATION

San José State University — San Jose, CA
B.S. Electrical Engineering — *Expected May 2029*
- **Relevant coursework:** EE 30 Microcontrollers (C), Linear Algebra, AP Computer Science A (5), AP Statistics (5)

Diablo Valley College — San Ramon, CA
CollegeConnect Dual Enrollment Program — *Completed Jun 2026*
- Completed 8 transferable college courses alongside high school; GPA: 3.90; student commencement speaker

Honors: AIME Qualifier (2022), National Merit Commended Scholar, AP Scholar with Distinction

TECHNICAL SKILLS

Languages: Python, C, Java
Hardware & Embedded: SPI, CAN bus, microcontrollers, battery management system (BMS) telemetry, MoTeC i2 Pro
ML & Data: LLM-as-judge, prompt engineering, NLP, scikit-learn, pandas, NumPy, inter-rater reliability
Tools: FastAPI, REST APIs, Streamlit, OpenAI and Anthropic APIs, MCP, pytest, Git

EXPERIENCE

Spartan Racing | SJSU Formula SAE Electric team — Sep 2026 – Present
Electronics & Software Team Member (BMS, VCU, Derating)
- Developing **SPI and CAN bus drivers** for the team's custom vehicle control unit (VCU)
- Found the pack's hottest sensors were reading **fuselink heating, not cell temperature**, and corrected the derating model's peak-temperature error from ~4 °C to 8–10 °C
- Studied the BMS slave board (ADBMS6830B cell monitoring, cell balancing, thermistor circuits, isoSPI); researching point-of-load converters vs LDOs for low-voltage power
- Built post-run telemetry checks (**under 1 s per log**) that flag BMS logging failures, dead sensors, and throttle cuts; merged into the team's pipeline
- Showed hard runs left only 2–4 min before a BMS fault and wrote the derating test plan for the next event

BiasLens | AI bias-detection tool backed by United Sikhs, a UN-partnered NGO — Jan 2024 – Present
Founder & Sole Developer — *github.com/JaspreetSinghA/biaslense*
- Shipped a **Python SDK on PyPI**, a rate-limited FastAPI REST API, a Streamlit web app, and an MCP server
- Rebuilt the scorer as a structured **LLM-as-judge** that rates text 1–5 on 5 dimensions with a written rationale; validated it on a hand-labeled benchmark with a held-out test split
- Calibrated the original rule-based scorer on **276 human ratings** (6 raters, 3 LLMs) with Krippendorff's alpha; presented at the United Sikhs Summit 2025

Rayfield Systems | VC-backed energy-efficiency startup — Jun 2025 – Jul 2025
AI & Automation Intern, Harvard Undergraduate Ventures-TECH Summer Program — *Remote*
- Cut manual reporting time **35%** and raised data accuracy **25%** by automating compliance reporting with a Python tool
- Trained 8 teammates to run the new reporting process

LEADERSHIP

Blind Dev, California High School — 2023 – 2026
Vice President
- Co-led 3 accessibility hackathons with ~90 participants a year; mentored 12 teams building foundations for computer vision tools such as AI-powered glasses, OCR readers, and navigation aids

Boy Scouts of America — 2022 – 2025
Eagle Scout; Senior Patrol Leader
- Led a 120-scout troop as Senior Patrol Leader: 30+ outings, 10+ service projects, and three 8-day, 50-mile backpacking expeditions (Yosemite, Grand Canyon) for crews of 12
- Directed an Eagle Scout literacy drive that delivered ~1,400 books and ~1,300 school supplies (>$15,000) to Jaswant Singh Khalra Elementary

Interests: Competitive bhangra (Bhangra Empire All-Stars, Warriors halftime show), cross country (18:25 5K), swimming
